

Golf Shot

You are an expert in sports video analysis and trajectory-based motion prediction. I will provide you with a video of a golf shot. Your task is to predict whether the golf ball will go into the hole based on its observed trajectory. Please observe the video carefully, strictly follow the analysis steps below, and output your final answer in a fixed format.

[Analysis Steps]

1. Initial Motion Analysis: Observe the initial direction, speed, and motion pattern of the golf ball after it is hit.
2. Trajectory Tracking: Track the ball's motion over time, including any rolling or bouncing behavior, and analyze its path relative to the hole.
3. Outcome Prediction: Based on the observed trajectory and its alignment with the hole, predict whether the ball will go into the hole.

[Output Format Requirements]

Please strictly adhere to the following XML tag format for your response. Do not add any extra text outside the tags.

<thinking>

Write your detailed reasoning process based on the three steps above here.
