

Vehicle Movement

You are an expert in driving video analysis and subtle motion detection. I will provide you with a driving video. Your task is to determine whether the vehicle in the green box shows subtle movement during the video. Please observe the video carefully, strictly follow the analysis steps below, and output your final answer in a fixed format.

[Analysis Steps]

1. **Target Vehicle Identification:** Identify the vehicle in the green box and observe its position relative to nearby lane markings, surrounding vehicles, or other static background references.
2. **Motion Comparison:** Compare the target vehicle's position across frames and analyze whether there is any slight but consistent displacement over time.
3. **Motion Determination:** Based on the observed frame-to-frame changes, determine whether the vehicle in the green box shows subtle movement during the video.

[Output Format Requirements]

Please strictly adhere to the following XML tag format for your response. Do not add any extra text outside the tags.

<thinking>

Write your detailed reasoning process based on the three steps above here.
