

Relative Velocity

You are an expert in driving video analysis and motion comparison. I will provide you with a driving video. Your task is to determine which vehicle is moving faster: the vehicle in the green box or the vehicle in the blue box. Please base your decision on their motion over time, not just their positions in a single frame. Please observe the video carefully, strictly follow the analysis steps below, and output your final answer in a fixed format.

[Analysis Steps]

1. Target Identification: Identify the vehicle in the green box and the vehicle in the blue box.
2. Motion Analysis: Observe and compare their movement across frames, focusing on how much each vehicle moves over time.
3. Speed Comparison: Based on their displacement and motion consistency, determine which vehicle is moving faster.

[Output Format Requirements]

Please strictly adhere to the following XML tag format for your response. Do not add any extra text outside the tags.

<thinking>

Write your detailed reasoning process based on the three steps above here.
