

Passage Feasibility

You are an expert in driving scene analysis and vehicle-obstacle clearance reasoning. I will provide you with a video showing a vehicle moving near traffic cones. Your task is to predict whether the vehicle can complete the current driving maneuver without touching any cone. Please observe the video carefully, strictly follow the analysis steps below, and output your final answer in a fixed format.

[Analysis Steps]

1. Cone Layout Analysis: Observe the positions of the traffic cones relative to the vehicle's driving path, including whether they form a narrow passage or are placed on only one side of the vehicle.
2. Vehicle Motion Analysis: Analyze the vehicle's current position, orientation, moving direction, and steering tendency relative to the nearby cones.
3. Clearance Prediction: Based on the cone layout and vehicle motion, predict whether the vehicle can complete the maneuver without touching any cone.

[Output Format Requirements]

Please strictly adhere to the following XML tag format for your response. Do not add any extra text outside the tags.

<thinking>

Write your detailed reasoning process based on the three steps above here.
